GRUAN ICM-11

Science Coordinator Discussion

Tom Gardiner

Singapore, 20th May 2019

Science Coordinator Role

- Lots of relevant research happening across network – see rest of ICM programme.
- Key science priorities identified previously being delivered by existing activities.
 - RS92/RS41 change over – see Session 6
 - SASBEs – e.g. RIVAL campaign, Jordis' paper, GMAC plans.
- Original SC concept of identifying and coordinating joint research activities not really working at present.
- Need to review/refine SC role – feedback from network followed by discussion with WG and Co-chairs.
- Propose to focus on supporting consistency in uncertainty evaluation and reporting across network – see talk tomorrow.
