

# I) Preliminary Data Release (near) real time

(e.g. under WMO Resolution 40  
"Additional Data", i.e. restricted  
dissemination)

# II) Full Data Release delayed mode (6 months)

(e.g. under WMO Resolution 40  
"Essential Data", unrestricted dissemination)

# Open questions

- 2 track approach?
- WMO Res. 40 categories (“Essential”, “additional”)?
- Caching of data in GTS GISCs (24 h)?
- Coding format (BUFR, other)?
- Expertise in DWD, elsewhere (to develop concept)?
- Other technical details?
