La Réunion

28 November - 02 December 2022

## GRUAN Site Report for Minamitorishima

*(Submitted by Junji Hisamitsu)*

---

### **Summary and Purpose of this Document**

Report from the GRUAN site Minamitorishima for the period January to December 2021.

---

## **Overview**

Minamitorishima contributes to GRUAN with its iMS-100 radiosonde, which observes twice a day, and its GNSS IPW operational data stream. Other activities at Minamitorishima include, radiation observation and greenhouse-gases observation. The iMS-100 performs manufacturer-independent ground checks at 0% and 100% RH at SHC prior to launch.

## **Change and change management**

There are no changes in operating procedures during the reporting period. All operators will be replaced in three months.

## **Resourcing**

We continue to be asked to significantly reduce the cost of observations. The use of SDF transport aircraft to move to the island may be limited.

## **Operations**

Minamitorishima has problems with balloon bursts near the tropopause and at low altitudes. Therefore, we are considering countermeasures in consultation with balloon makers and radiosonde makers.

## **Covid-19**

NIL

## **Site assessment and certification**

Preparation for site certification of Minamitorishima is in progress by JMA.

## **GRUAN-related research**

NIL

## **WG-GRUAN interface**

NIL

## **Other archiving centers**

MINAMITORISHIMA

- Aerosols observation: WDCA (GAW)
- Surface ozone observation: WDCRG (GAW)

## **Participation in campaigns**

NIL

## **Future plans**

NIL

# GRUAN Site Report for Minamitorishima (MTS), 2021

Reported time range is Jan 2021 to Dec 2021

Created by the Lead Centre

Version from 2022-11-15

## 1 General GRUAN site information

Object	Value
Station name	Minamitorishima
Unique GRUAN ID	MTS
Geographical position	24.2900 °N, 153.9800 °E, 9.0 m
Operated by	JMA   Japan Meteorological Agency
Main contact	Hisamitsu, Junji
WMO no./name	47991 MINAMITORISHIMA
Operators	currently 5, changes +0 / -0
Sounding Site	1

### 1.1 General information about GRUAN measurement systems

System	Name	Type	Setups	Measurements
MTS-RS-01	Minamitorishima radiosonde launch site	Sounding Site	1	729

### 1.2 General comments from Lead Centre

#### 1.2.1 Dataflow

For this remote site an intermittent (batch-like) dataflow was established in 2018. Data packages of approximately one month are submitted to the GRUAN LC.

## 2 System: Minamitorishima radiosonde launch site (MTS-RS-01)

Object	Value
System name	Minamitorishima radiosonde launch site
Unique GRUAN ID	MTS-RS-01
System type	Sounding Site (RS - Radiosonde)
Geographical position	24.2900 °N, 153.9800 °E, 9.0 m
Operated by	JMA   Japan Meteorological Agency
Instrument contact	Hisamitsu, Junji
Started at	-
Defined setups	1 (ROUTINE)
Possible streams	IMS-100

### 2.1 Lead Centre comments

#### 2.1.1 Dataflow

Sonde dataflow to the GRUAN LC is operational since May 2018.

#### 2.1.2 General

Routine soundings are performed two times per day.

Current operational radiosonde is the Meisei iMS-100.

### 2.2 GRUAN data products

Product	Version	Soundings received	Available at LC	Distributed by NCEI
---------	---------	--------------------	-----------------	---------------------

#### 2.2.1 Stream: IMS-100

IMS-100		729	729	
IMS-100-BETA	002		724	

## 2.3 Availability of data products

Available (green): All steps of data processing have been successfully completed. The data product file is available at LC (e.g. files that didn't pass QA/QC or uncertified GRUAN data products) and/or at NCEI (a certified GRUAN data product file that did pass QA/QC).

Unprocessed (yellow): The manufacturer-produced file with raw measurement data has been successfully converted into a GRUAN-standardized raw data format (NetCDF). The GRUAN data processing has not been performed or was aborted. Reasons for this may be a still missing GRUAN data processor or a processing-software error.

Original (red): The original, manufacturer-produced, raw data file is available (e.g. MWX data file) but was not converted into a GRUAN-standardized raw data format (NetCDF). Reasons for this may be missing data conversion software, a software error, or a corrupt data file.

### 2.3.1 Stream: IMS-100

## 2.4 Instrument combinations of MTS-RS-01

Count	Instrument combination
729	IMS-100

## 2.5 Instrument ground check

### 2.5.1 Stream: IMS-100

#### (1) GroundCheck: GC-TU(0)

#### (2) GroundCheck: GC-TU(100)

**(3) GroundCheck: GC-TU(room)**

**2.6 Measurement events**
