

Support to GRUAN through competitive proposals for funding and partnerships

Fabio Madonna

University of Salerno, Italy

fmadonna@unisa.it

GRUAN needs

GRUAN is voluntary basis effort, although mostly built upon existing facilities run by Met Service and research institutions, the latter often operating upon the support by external fundings from competitive projects.

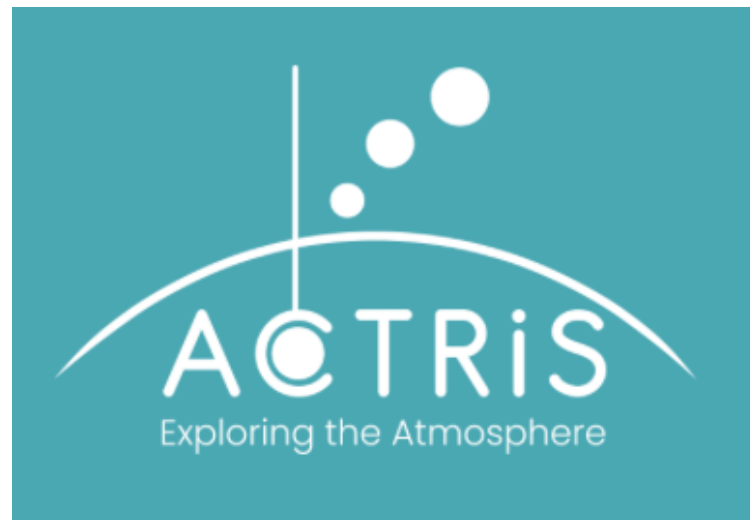

To enhance the effort of the sites and the overall community to complete the implementation of the network and increase the scientific impact of the GDPs we need

- Networking activities, funding supported
- Travel support for ICMs and other events to show progress made in GRUAN
- «Manpower» to carry out specific studies for improving and assessing the impact of GDPs.
- Support for specific experiment and campaigns with GRUAN and the development/assessment of the GDPs as the main focus.

..... Opportunities from a Pan-European perspective

Opportunities for experiments

- Informal discussion had to ACTRIS to have a formal agreement.
- Possibility to arrange experiment, measurement campaign and training with the financial support by ACTRIS.
- More details in the presentation by S. Gagliardi (on Friday)

Opportunities for «manpower»

Marie Curie projects: Phd and post-program (open to multidisciplinary topic)

MSCA Feedback to Policy 2024

Status: Forthcoming

Opening: 25 April 2024
0:00 CEST

Deadline: 3 September 2024
17:00 CEST

MSCA Feedback to Policy 2024

For UE and Horizon Europe Associated Countries

https://ec.europa.eu/info/funding-tenders/opportunities/docs/2021-2027/common/guidance/list-3rd-country-participation_horizon-euratom_en.pdf

EU COST actions

Organising meetings,
workshops & conferences

Short-term scientific
missions

Training schools

Communication
& dissemination activities

Virtual
networking tools

COST Actions offer an inclusive, pan-European environment for individuals of all levels of seniority to grow their professional research networks and boost their careers.

COST supports and encourages the participation of international partners coming from non-COST Members in all of its Actions.

<https://www.cost.eu>

The Open Call 2024 is open. The next collection date will be 23 October 2024 at 12.00 (noon) CEST. The following collection date is expected in Autumn 2025

It does so by providing financial support (to its Near Neighbour Countries) and offering Partner Member status (to its International Partner Countries).

Other possibilities

- Bilateral agreements
- European Space Agency and other space agencies tenders
- Horizon Europe calls, but often not tailored for climate network.
- Several calls based on the EU Commission Global Approach to Research and Innovation, Europe's strategy for international cooperation in a changing world (e.g. encouraging climate research in the African countries).

Discussion

What does the GRUAN community think it needed to support the network operation and progress?

Need to monitor opportunities also outside GRUAN

CNR-IMAA (Potenza) and University of Salerno offers the support by their management office to setup proposal for competitive call and tenders (up to 20% of time an person-year).
