

GRUAN Implementation Plan and meeting structure

Peter Thorne, Stephan Bojinski,
Anna Kuhn

A 4 year road map

- Implementation Plan represents a substantial effort by WG, LC and sites to provide a coherent vision of a route forwards
- Thanks to all those who participated in its creation.
- Plan can and will be modified

Rationale for the structure of this meeting

- Structure follows the Implementation Plan structure
- Designed to ensure that we do not skip any issues contained within.
- Needs you all to be alert and to read the relevant sections to ensure nothing is missed

Cross-talk

- We will cover the same subject from different viewpoints throughout ICM-2
- Some of these issues may be contentious – courtesy is contagious 😊
- Allows opportunity for off-line discussion

Meeting differences from last year

- Single day chairs (hoped this will give better consistency)
- More time for sites
- Slightly earlier last day finish to allow discussions amongst action holders (this got squeezed over time)
